*Ennis Coloured Aggregate*, when used with suitable binder, is a durable, skid resistant, coloured surface, traffic delineation treatment for roads, vehicle and pedestrian pavements. It is used for traffic delineation, traffic calming and skid resistant treatment. Applications include bus and cycle lanes, school zones, pedestrian crossings, and zones requiring high friction for safety (e.g. roundabouts, intersections, etc.). *Ennis Coloured Aggregate* can be applied over existing asphalt and concrete and provides long term coloured, safety and aesthetic pavement performance. It eliminates UV degradation of the pavement, reduces chemical and water absorption, and is resistant to oil, petrol and diesel, effectively extending the life of the road pavement.

It is available in a range of colours and sizes to meet the specified requirements.
