

# "Self-Recovering" Pedestrian Barriers

Our fully "recoverable" Pedestrian Barriers, are made from Steel Tube & Powder Coated to give a durable weather resistant finish.

At the base of each support leg is our **Patented "FLEXI-TUFF®" Hinge**. This is what gives our product its unique ability to fully recover to the upright position after a collision.

Various Shape Barriers & colours are available.

**"Retro fittabe"** using existing steel Sockets  
(above)

Longer "Flexi-Tuff" Hinge length required for direct Socket Mounting.

**NOTE;** Surface mounts can be used in conjunction with this installation method if existing steel socket is at ground level

**Surface Mounted Fixing**  
For ease of secure fitment
